

Curriculum Vitae

Personal Information

First Name: Siavosh

Last Name: Kaviani

Gender: Male

Birthday: 1961 at Tehran

Country of Citizenship: IRAN

Marital Status: Married

Children: two (sons)

Native Language: Persian (advance)

Second language: English (advance)

Third language: French (B1)

Resident in *Paris*

Education

PHD of Computer Engineering, major in Software Engineering, QL-1991
UNIVERSITY

Master degree of Computer Engineering, major in Software 1988
Engineering, QL-UNIVERSITY

Bachelor degree, Computer Engineering, major in Hardware 1986
Engineering, **Behшти** University, Tehran

Short List Main Duties And Responsibilities On [Wordpress](#)

1. Provide periodic backups of site panel files and settings
2. Provide periodic backups of database and website content
3. Security Update Portal of WordPress Website Portal
4. Security Update WordPress Portal Add-ons as Required
5. WordPress Developer -Plugin development – Debugging – performance enhancement – Html CSS and JavaScript
6. WordPress Designer-User interface design- themes and templates implementation and modification. Photoshop PSD to template conversion.

Curriculum Vitae

7. Configure Woocommerce settings and implementing full functional e-commerce website with e-commerce
8. Integrating the Woocommerce with local application (database)
9. Register on Google Webmaster and Google Analytics
10. Install essential plugins for website
11. Automatically upload site content to social networks
12. WordPress kernel update, templates, and extensions
13. Make template settings
14. Disable plug-ins as needed to improve performance
15. Block spam comments
16. Clearing the site from malicious files
17. Remove unnecessary extensions to ensure proper performance
18. Installation and configuration of essential add-ons at the discretion of the technical team
19. Ensure that the website is fully operational and functioning properly
20. Free launch of Google Ad campaigns on order
21. Check source code and source pages for bug fixes and optimizations
22. Ensure that pages 404 are missing and that redirects are created
23. Increase and optimize site loading speed with appropriate plugins
24. Provide and install free SSL Certificate annually as needed
25. Possible bug fixes SSL Certificate site and ensures proper operation
26. Report on improvements and changes made to the website
27. Increase site loading speed with advanced techniques to the maximum possible technically-
28. Free launch and optimization of Google Ad campaigns
29. Possibility of requesting purely physical changes to existing site design
30. Install and configure extensions
31. Custom Landing Page Design
32. Design slider or content images
33. Create pop-up forms on specific pages to get leads and increase ROI
34. Fixes problems with site optimization
35. Provide and post weekly content for social networks as needed
36. Send the newsletter to site members
37. Providing free advice on planning a client club

Short list Main Duties and Responsibilities on [WordPress SEO](#)

[On-Page SEO](#)

- **Professional research of your business keywords:**

We help you identify the best and most relevant [keywords](#) for your business and use them on your website, business path, products and content plan to find your best Google customers.

- **Professional Configure of SEO plugins**

Install and [configure plug-ins](#) on your site according to your chosen keywords along with original plug-ins

Curriculum Vitae

- Analyze and resolve SEO issues within the site

[Analyze all SEO](#) related issues, including linking, header status, and footer, and so on for SEO problems, troubleshooting, and optimizing solutions for the future.

- Designing a future-oriented site structure

No matter what store or site you have, we design the best store, site, and blog structure for you to best meet all your audience needs and make it easy and low cost for you to get a Google 1 link.

- Site preparation to get started

List all the website technicalities including template requirements as well as your startup tools, get the resources you need, and prepare your website or store to get started so you can get started.

- Content design and content production

Whether your site is new or outdated, we are designing a 30-item content plan (10 content per month) for your future so you can work on them and get the best feedback from the content you produce.

Off-Page SEO

- Designing a powerful and robust linking program

We are designing a [linking](#) program based on targeted business instructs to help you secure white hats with no risk and know where to link in the future.

- Competitor analysis and presentation of their activity plan

We have extracted the link profiles and the backlinks of your main competitors and analyzed their form of activity so that we can use these analytics to improve both your site and in the future for consistency between the first results.

- Delivering analysis and troubleshooting in the console search

Check out the various sections of the console search and report the main disadvantages of not getting traffic and site visits as well as major technical issues and troubleshooting tips to help you work better.

My Objects in Doing WordPress Projects and Projects

I help you run and support your business by creating dynamic WordPress sites and proper SEO and properly investing. To do this, in addition to designing and selecting the right theme and templates and enhancing performance and structure data, by doing keyword research, you can be at the forefront of Google search.

Curriculum Vitae

With my white Hat SEO strategy, we help businesses design and build a great site for their target audience, in one sentence, I help you understand your target audience and have specific strategies in place. Make Google your industry leader.

Using a team of freelancers in addition to running the project on-site, I can offer my services remotely. And support my employer against additional payments. In the meantime, "i am capable to manage a team of freelance experts and take charge of the work from A to Z."

My New Experience on WordPress:

- Avenger It Next Generation
- Mabanoo site Cooking & Recipes / Housekeeping / Fine Arts
- Behjat bookshop (Woocommerce)
- Ksr@ Research Association (under construction)
- Maison Tahissa Art Gallery
- Vestibulology Scientific magazine

Computer Skills

- Good knowledge of Unix Administration
- Good knowledge of Network Tuning
- Good knowledge of Shell Programming
- Good knowledge of web/ mobile/portal/application Programming

Operating Systems

- UNIX Family
- Windows Family

Other Knowledge:

- Network protocols (TCP/IP, Ftp, Telnet, SMTP, POP3, HTTP, SSH)
- Firewall and related topics (Proxy)
- Data Recovery

Curriculum Vitae

Application Software Tools:

- Rational Rose, OracleDesigner2000, Oracle Developer 2000, Oracle JHeadstart, Oracle Jdeveloper2000, Internet related tools, FrontPage. TATA Case tool, Evergreen Tool Oracle Application server, WordPress, Life Ray Portal, Mambo CMS (PHP) .oracle Apex development tool.

Short List Of Publications (Of Minimum 100):

Publication title: A New Method for Knowledge Representation in Expert System's (XMLKR)

Publication date 2008 publication description IEEE Explore Conference: Emerging Trends in Engineering and Technology, 2008. ICETET '08. First International Conference on

Publication description Abstract:

Knowledge representation it's an essential section of a expert systems, because in this section we have a framework to establish an expert system then we can modeling and use by this to design an expert system. Many method it's exist for knowledge representation but each method have problems, in this paper we introduce a new method of object oriented by XML language as XMLKR to knowledge representation, and we want to discuss advantage and disadvantage of this method.

[See publication A New Method for Knowledge Representation in Expert System's \(XMLKR\)](#) [See publication](#)

Publication title: An Agent-Oriented Framework for software Testing

Publication date 2008 publication description 3rd International Conference of Information and Knowledge Technology 2007 (IKT'07), Ferdowsi University, Mashhad, Iran.

Publication title Mining Scientific Paper References to Find Anomaly and Fraudulent References

Publication date 2008 publication description 2nd Data Mining Conference, (IDMC 2008), Amirkabir University of Technology, Tehran, Iran. (Submitted)

Publication title using a Two-way Balanced Incomplete Block Design to Comparing an Agent-Oriented Software Engineering Methodologies

Publication date 2007 publication description Published in ENASE 2007

Publication description there has been a surge of interest in agent-oriented software engineering in recent years. Numerous methodologies for developing agent-based systems have been proposed in the literature and the area of agent-oriented methodologies is maturing rapidly. Evaluating methodologies' strengths, weaknesses and domains of applicability plays an important role in improving them and in developing the "next-generation" of methodologies. In this paper, we present a reliable framework that adopts statistical techniques to compare agent-oriented methodologies. Based upon this framework we performed a comparison of four AOSE methodologies MaSE, Prometheus, Tropos and Gaia

Publication title: Comparing agent-oriented methodologies using NFR approach

Curriculum Vitae

Publication date 2004 publication description Published in ICSE 2004 DOI: 10.1049/ic: 20040353

Publication description: there is an ever-increasing demand for standard software systems to operate in increasingly complex application environments. Hence, agent-orientation appears as a well-suited paradigm for building such systems. Although several methodologies have been proposed for agent-oriented development, it's difficult to evaluate them because they usually differ in their premises, covered phases, models, concepts and the supported multi-agent system properties. In this paper, we show that the NFR (Non-Functional Requirements) framework is useful to describe properties of agent-oriented systems as well as to evaluate well-known methodologies supporting them. Moreover, other-methodological aspects are used as criteria to analysis and compare these methodologies. A comparison between GAIA and Tropos is shown as an illustration of our proposal.

Recent Web White Paper Publications:

Publications Date In 2019: (with Business/ scientific Approach)

Publication Description: Publications are generally in categories related to web topics. These articles are written in both French and English.
